LOGIVISION

L-POS™ software

L-POS *is an easy to use, easy to manage point of sale system designed specifically for retailers seeking high speed transaction entry and secure data recording.*

L-POS *includes all the tools you need to design entry screens, manage peripherals, and interface with the back-end application.*

Whether you run a small liquor store or a multi-lane supermarket, **L-POS** *can be tailored to meet your POS needs.*

LOGIVISION
210, Laurier Beloeil (Quebec) Canada J3G 4G7
Tel : 450. 464-2131 Fax : 450. 464-5673

L-POS™ System features and options

POS & Invoicing
- Touch screen or keyboard operation mode.
- Individual screen design for cashier and customer when using dual monitors.
- Each lane includes an item file with price pending file.
- Flip charts for item search.
- Item search within POS transaction.
- Multiple discounts and coupon functions
- Item correction, past item void, past sale void, void all, refund / exchange with programmable limits and manager authorization
- Negative check file sharing to ensure check cashing limits and security.
- Suspend sale with resume from any terminal.
- Training mode.
- Regular price, split price, mix and match price, limited quantity discount pricing.
- Electronic discount with amount or % off.
- Unlimited number of price levels per item.
- Suggested retail price comparison with "You saved" printing.
- Customer entry with recalculation of pricing for preferred shoppers.
- Charges with account balance verification.
- Preferred shoppers with point management, price level assignment, discount status, etc.

Screen and keyboard design tools
- Set-up mode provides complete control over screen configuration
- Remodel both touch screen form layout, button size, text, position
- Redesign keyboard layout for keyboard based terminals
- Mix touch screen and keyboard terminals in same store as needed

On-line data exchange
- Each lane runs from a local hard drive and from a completely independent local database.
- Sales data is processed by back-office software as each transaction is completed which means that no day end process is required.
- Continuous front-end operation and unassisted recovery in the event of back-office system failure.

Peripherals management
- Internal drivers for printers, scanners, scales, magnetic card readers, pole displays, keyboards, bank pin-pads, cash drawers, etc.
- OPOS support for certain device classes.
- Supports both receipt and full invoice printing

On-screen Advertising module
- Create your own slide show
- Images and text files display on screen
- Advertise during transaction on reduced screen area or between transactions in full screen mode
- Easy set-up and maintenance

Electronic Journal
- Records all sales data for search and review when needed
- Data stored on each lane and on back-office system

Lane monitoring
- Runs on any PC on the local area network
- Monitor multiple lanes simultaneously
- Output data to serial or TCP/IP port for external video surveillance system

Requirements
Windows 2000, Windows XP operating system and networking components required. Minimum P3 700mhz with 128MB is recommended.
